

Conference Programme

“Ageing, Health and Quality of Life of People with Intellectual Disability: Preparing for Policy and Service Responses in Ireland”

- One Day Conference
- Hosted by School of Nursing & Midwifery, Trinity College Dublin, 24 D'Olier Street, Dublin 2
- Friday, 17th September 2010, 9.00am - 4.30pm

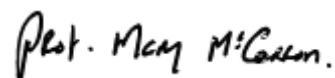

About the conference

Population ageing is a triumph, but also presents important challenges and opportunities for the 21st century across all sectors of society. The purpose of the conference is to bring together people who are interested in the ageing population of people with intellectual disability in Ireland.

Never has there been a more exciting time to learn about, and join, the movement towards planning for, and responding to, the growing ageing population of people with intellectual disability nationally.

The conference will provide a platform for national and international exchange, and a point of connection for all attendees, to help bridge the policy and practice gap between ageing and intellectual disability.

We are delighted to welcome a wide range of speakers from across the disability and ageing sectors to share their knowledge, insights and experience. The conference promises to be an inspiring, informative, and challenging event – we hope you can join us!
